DAO DUC TAM

Software Engineer

(+84) 825159401 | tamdao1742005@gmail.com | daoductam.github.io/Portfolio/ | daoductam

Summary

- Position: Java Developer
- Fourth-year Software Engineering student (Hanoi University of Industry) with a strong focus on Java Backend development. Passionate about building scalable, high-performance systems. Eager to join a professional environment to apply technical skills and contribute to real-world projects.

Education

Hanoi University of Industry

Vietnam

B.S. in Software Engineering — *Aug. 2023 - Aug. 2027*

- GPA: 3.3/4.0

Work Experience

RIKKEISOFT

Vietnam

SOFTWARE ENGINEER INTERN — *09/2026 - Present*

- Contributing to the **Cloud Service (CarLLM) — OTA Platform for Head Units** project.
- Researching and studying **AWS** services and cloud architecture concepts to support the project's solution design and documentation.
- **Focus Areas**: AWS, Cloud Architecture, Solution Design, Technical Documentation.

VIETTEL SOFTWARE

Hanoi, Vietnam

BACKEND DEVELOPER INTERN — *06/2026 - 09/2026*

- Completed an intensive **11-session Backend training program** covering SDLC, Agile/Scrum, Git Flow, advanced SQL, RESTful API design, JWT/RBAC security, and OWASP Top 10 defenses.
- Built a **Capstone Project**: Task Management System with **Java 17 & Spring Boot 3**, featuring JWT authentication, **Redis** caching (Cache-Aside), **RabbitMQ** async notifications, and Kanban Web UI.
- Designed a **PostgreSQL** database normalized to **3NF** with B-Tree indexing; wrote **Unit Tests** (JUnit 5 & Mockito) achieving $\geq 80\%$ code coverage.
- Containerized the full stack using **Docker Multi-stage Build** & **Docker Compose** (backend, PostgreSQL, Redis, RabbitMQ).
- **Technologies**: Java 17, Spring Boot, Spring Security, JWT, PostgreSQL, Redis, RabbitMQ, Docker, JUnit, Mockito, Swagger.

AILOGY

Vietnam

BACKEND DEVELOPER - AUTOTAX PROJECT — *12/2025 - 2/2026*

- Developed core backend services using **Python (FastAPI)** and **PostgreSQL**.
- Implemented **Telegram OTP** integration and profile management for secure authentication.
- Built **WebSocket** gateways for real-time **AI Chatbot** communication and notification APIs.
- Authored **technical documentation** and conducted **unit testing** to ensure system stability.
- Optimized data integrity using **SQLAlchemy** and **Pydantic** schemas.
- **Technologies**: Python, FastAPI, PostgreSQL, WebSocket, Telegram API, Redis, Pytest.

FREELANCER

Vietnam

LOYALTY PROGRAM — *6/2025 - 9/2025*

- Built a scalable Loyalty System using **Java Spring Boot** and **PostgreSQL**.
- Integrated **JWT** security and **Minio** for optimized file storage management.
- Maintained $\geq 80\%$ test coverage using **JUnit** and **Mockito**.
- Containerized applications with **Docker** and secured secrets via **Hashicorp Vault**.
- **Technologies**: Java, Spring Boot, PostgreSQL, Docker, Redis, Kafka, OpenAPI.

Projects

REVITA: POLYCLINIC MANAGEMENT SYSTEM - PERSONAL PROJECT *05/2026 - 08/2026*

- Architected a **Microservices** ecosystem using **Java 21 & Spring Boot 3.3**, comprising **10 business services** (Auth, User, Clinic, Appointment, Queue, Clinical, Billing, CMS, AI, Notification) orchestrated via **Spring Cloud Gateway** and **Eureka**.
- Implemented **Event-Driven Architecture** with **Apache Kafka** (leveraging **Outbox pattern**, retry/DLT) for asynchronous processing; integrated **WebSocket (STOMP)** for real-time queue tracking and instant notifications.
- Engineered end-to-end clinical workflows, **RBAC (6 roles)**, medical record encryption, automated billing via **PayOS**, and an **AI Assistant (FastAPI, Groq/Gemini)** for symptom-based diagnostic suggestions.
- Designed polyglot persistence (**MySQL** for business data & **MongoDB** for drug catalog), **Redis** cache; built web UI with **Next.js 15 & React 19**; containerized and deployed on **Docker & Kubernetes (Minikube, Helm, Traefik)**.
- **Technologies**: Java 21, Spring Boot, Spring Cloud, FastAPI, Python, Apache Kafka, Redis, MySQL, MongoDB, Next.js, Docker, Kubernetes.

CINESTREAM: FULL-STACK MOVIE STREAMING ECOSYSTEM - PERSONAL PROJECT *04/2026 - 07/2026*

- Built a full-stack movie streaming ecosystem with a **Java 21 & Spring Boot 3.4+** REST backend for **React 19** web and **Android Native** clients; used **MySQL** for business data and **Redis** to cache popular movie categories.
- Implemented stateless authentication with **Spring Security**, **BCrypt**, and **JWT Refresh Token Rotation**; added an IP-based **Rate Limiting Filter** to mitigate DDoS and spam requests.
- Automated movie data synchronization from external providers with a **WebClient crawler**; integrated **Groq AI SDK** to provide a conversational movie recommendation chatbot.
- Developed the web client with **React 19 & TypeScript**, **Vite**, **Tailwind CSS 4**, **Zustand**, **TanStack Query**, and **Vidstack** for HLS playback; built the Android app with **Kotlin & Jetpack Compose (Material 3)**, **Hilt**, **Room** offline history/favorites, and **Media3 ExoPlayer** for episode progression and watch-progress tracking.
- Containerized the system with **Docker & Docker Compose** and configured **GitHub Actions (CI/CD)**.
- **Technologies**: Java 21, Spring Boot, Spring Security, MySQL, Redis, Groq AI, React 19, TypeScript, Tailwind CSS, Kotlin, Jetpack Compose, Room, Media3 ExoPlayer, Docker, GitHub Actions.

Honors & Awards

- **Full Academic Encouragement Scholarship** at Hanoi University of Industry (GPA: **4.0/4.0**) – Semester 2. *2025*
- **Full Academic Encouragement Scholarship** at Hanoi University of Industry (GPA: **3.94/4.0**) – Semester 2. *2026*

Skills

- **Programming languages**: **Java** (Primary Focus), Kotlin, TypeScript, Javascript, Python.
- **Backend**: Quarkus, Spring Boot, Spring Cloud, Spring Security (JWT/OIDC), gRPC, MapStruct, Swagger.
- **Frontend & Mobile**: React, Next.js, Tailwind CSS, TanStack Query, Zustand, Framer Motion, Jetpack Compose.
- **Databases & Caching**: MySQL, PostgreSQL, Redis.
- **DevOps & Tools**: Docker, Kubernetes, GitHub Actions (CI/CD), Git, Linux, Jira.
- **AI-Assisted Development**: GitHub Copilot, Antigravity, Claude, ChatGPT; Prompt Engineering for code generation, debugging, automated unit test generation, and code review.
- **Others**: Apache Kafka, REST API, HLS Streaming, OOP, Microservices, Event-Driven Architecture.

Languages

- **English**: TOEIC 600.
- **Japan**: JLPT N5.
